

Mohamed Mostafa Hassan Afify

Data Analyst | SQL | Power BI & Tableau | Python

Cairo, Egypt | +20 101 504 2480 | mohamedmhafify@gmail.com | [linkedin.com/in/mohamedmhafify](https://www.linkedin.com/in/mohamedmhafify) | github.com/mohamedmhafify

PROFESSIONAL SUMMARY

Data Analyst who turns messy, disconnected data into decisions. Recently modeled 5 relational tables into a **SQL Server** star schema and delivered a **Tableau** dashboard suite that traced **\$7.8M** of at-risk revenue to its root causes. Strong in **SQL**, **Power BI (DAX)**, **Tableau** and **Python**, with an engineering background in AI and computer vision that adds depth to feature work and automation. Currently completing the **NTI Creativa Data Analysis & Freelancing Diploma** (Digital Egypt Youth Initiative), and trained by **NVIDIA & ITI**, **Google** and **Route Training Center**.

EDUCATION

B.Sc. in Computers and Management Information Systems (MIS) 2019 – 2023
El Gazeera Higher Institute, Cairo

PROFESSIONAL EXPERIENCE

Maintenance Engineer — Vision Company, Cairo Dec 2023 – Jan 2025

- Tracked equipment performance and maintenance logs to surface recurring failure patterns, turning scattered records into a usable reporting base.
- Audited inventory and sales data for inconsistencies, resolving data-quality issues that were distorting operational reports.
- Structured technical and procurement data to support performance tracking and day-to-day operational decisions.

PROJECTS

IBM Telco Customer Churn — End-to-End Analytics [GitHub](#)

- Modeled 5 relational tables (7,043 customers) into a **SQL Server** star schema; wrote 15 T-SQL queries using JOIN, CASE, HAVING and window functions to quantify churn drivers.
- Built a **Python** pipeline — domain-aware imputation, IQR capping with a zero-variance guard, feature engineering, stratified split and scaling; removed all target-leakage columns before modeling.
- Designed 4 connected **Tableau** dashboards; found month-to-month contracts churn **18×** more than two-year (45.8% vs 2.5%), driving 5 recommendations on **\$7.8M** of at-risk lifetime value.

NTI Creativa Data Analysis & Freelancing Diploma

Wide World Importers — Power BI Sales Analytics [GitHub](#)

- Rebuilt a broken data model (26,397 transactions) into a corrected star schema (1 fact + 5 dimensions); authored **24+ DAX measures** across 5 measure tables.
- Designed 4 report pages (~63 visuals); cleaned and modeled data in **Power Query**, including a custom color-extraction column and a corrected fiscal calendar (Nov–Oct) verified from the data.

NTI Creativa Data Analysis & Freelancing Diploma

Ames Housing — Data Cleaning & Preprocessing [GitHub](#)

- Handled missing values, eliminated data leakage, encoded categorical features and applied log transformations to correct skewness.
- Ran exploratory data analysis with before/after visualizations to validate every preprocessing decision.

NTI Creativa Data Analysis & Freelancing Diploma

CERTIFICATIONS & TRAINING

NTI Creativa — Data Analysis & Freelancing Diploma — Cairo University (Digital Egypt Youth Initiative) [Ongoing](#)
SQL, Power BI, Tableau, Python for Data Analysis, Data Cleaning & Preprocessing, Data Visualization, Statistics

Database Fundamentals — Mahara Tech (ITI) [View Certificate](#)

Google AI Professional Certificate — Google / Coursera | 7 Courses [Verify Credential](#)

Generative AI Diploma — Route Training Center | 4 Courses + Capstone Projects [View Certificate](#)

AI & Machine Learning Diploma — Route Training Center [View Certificate](#)

TECHNICAL SKILLS

- Databases & Querying:** SQL Server (SSMS), T-SQL, Joins, Window Functions, CTEs, Aggregations, Data Modeling, Star Schema, ETL
- BI & Visualization:** Power BI (DAX, Power Query), Tableau (Dashboards, Story, Maps, LOD), Excel (Pivot Tables, Formulas), Dashboard Design, KPI Reporting
- Python for Analysis:** Pandas, NumPy, Matplotlib, Seaborn, Scikit-learn, Data Cleaning & Preprocessing, Feature Engineering, Exploratory Data Analysis (EDA)
- Analytics & Statistics:** Descriptive Statistics, Correlation & Multicollinearity, Outlier Treatment, Data Storytelling, Business Insights
- Also:** FastAPI, Streamlit, Git, Docker, LLMs & RAG, Computer Vision (YOLO, OpenCV)
- Soft Skills:** Problem Solving, Critical Thinking, Attention to Detail, Communication, Team Collaboration

LANGUAGES

Arabic (Native) • English (Professional Working Proficiency)
